RYAN JOSE BROSAS

AI ENGINEER / AGENT SYSTEMS BUILDER

Building systems so everything doesn't need you.

AI agents and automation that do real work in production. Model-agnostic, and built on data that actually holds up.

SUMMARY

Somewhere in your workflow there are 20 hours a week that an AI agent should already be doing.

I build AI agents and automation that take that off your team every week. I have worked across design, web, support, marketing, and client delivery so I know how teams operate.

I got into AI by building. One day an **n8n** workflow clicked and I went deep on agents, prompts, and RAG. Now I build scrapers, research and outreach agents, and **MCP servers that run in production**. I do not lock into one model vendor so I pick the right one for the job.

But a good AI system is only as good as what is under it. I think a lot about data architecture, how it is structured, where it comes from, and how it flows through the system. That is what makes agents actually reliable.

I care about the whole system. What breaks, and who checks the work. And I always tell you what worked and what did not.

EXPERIENCE · BUILD LOG

01

GTM & Automation Specialist LATEST

Brainforge · Oct 2025 - Mar 2026

- **Saved the team 10 to 15 hours every week** by building a repeatable process others could run to find and reach leads, using Clay, HubSpot, Apify, and PhantomBuster.
- **Brought in 3 to 5 solid leads per campaign**, running each one from start to finish.
- Set up HubSpot to update itself, so no one had to fix records by hand.
- Added a prequalification step, mostly automated with a light review, that filtered out weak leads so the team only worked the ones worth chasing.

02

GTM & Ghostwriter

Brainforge · Sep 2024 - Oct 2025

- **Grew the blog to 915,000 Google search impressions and 1,690 clicks**, at an average search position of 8.1.
- **Grew LinkedIn content to 206,405 impressions, up 616% in a year.**
- **Got Brainforge's content cited in AI answers** like ChatGPT and Claude, by writing it to be picked up by LLMs, not just ranked on Google.
- Brought the account to 3,824 profile viewers with steady, ghostwritten posts.

03

Copywriter, Web Designer & Developer, Graphic Designer

Upwork (Freelance) · Jan 2024 - Present

- Design and build fast, simple WordPress sites for all kinds of clients.
- **Grew client blog traffic by 20 to 30%** with SEO and clear writing.
- Turned that into real results: podcast invites, partnerships, and booked calls.

04

Process Associate / Quality Control Analyst

TT Active Digital Marketing · Laguna · Jul 2022 - Sep 2024

- **Brought in 10% more qualified leads and raised call quality by 30%**, hitting every quality goal for 6 months straight.

05

Outsourcing Manager

Demicreation Digital Solution · **Aug 2019 - Sep 2024**

- **Closed 20 to 30% more deals** and set up offshore teams across the Philippines, India, and Pakistan, keeping clients and call centers aligned.

06

Client Fulfillment Manager

WritersER · **Nov 2023 - Jul 2024**

- **Made clients 20 to 30% happier and the team 50% more efficient**; hired across dev, video, QA, and writing, and set clear SOPs.

07

Samsung Experience Specialist

Samsung Mobile · **Jan 2018 - Dec 2019**

- **Closed 700+ deals and grew store sales by 70%**, driving half of the store's top-phone sales with a simple who, what, why approach.

08

Quality Assurance Specialist

Bluelogic Solutions Inc. · Muntinlupa · **Sep 2018 - Aug 2019**

- Trained a new QA from scratch, and **raised campaign quality by 20 to 30%** using data.
